

Betalin Therapeutics Ltd. Policy for Sponsored Research Projects

i. Background

Betalin Therapeutics Ltd. ("Betalin") is developing the Engineered Micro Pancreas (EMP) to treat diabetes mellitus, to help diabetics restore normal glycemic control, and to relieve the patients from insulin injections and frequent blood glucose level measurement.

Betalin is actively seeking collaborations worldwide and interacting with leading research groups in the field of tissue engineering and cell therapy for the treatment of Diabetes. Betalin invites research groups to submit proposals for sponsored research projects according to the following guidelines:

ii. The proposal should include:

- Title
- Goal and Objectives
 - Briefly state the overall goal of the project.
 - List of milestones for achieving project goal
 - Each milestone should describe the target population as well as the expected outcomes and following steps
- Assessment of the contribution of the project to the development of EMP
 - Please include a project starting point (please cite data on preliminary investigations, if available, along with gap analyses with reference to the stated milestones), quantitative baseline data summary, initial metrics (e.g., quality measures). Describe the source and method used to collect the data.
- Project Design and Methods
 - Please describe the overall primary outcome measure and any additional measures that will be part of the measurement and evaluation scheme for the project.
 - Describe the planned intervention that will be tested in the research project and the way it addresses the established need.
 - Describe the experimental design of the project

- Evaluation and Project Outcomes
 - Describe how you expect to collect and analyze the data
 - Describe how you will determine if the practice gap was addressed
 - Describe how the project outcomes will be broadly used

- Anticipated Project Timeline

- The Budget
 - The budget amount requested must be in U.S. dollars (USD).
 - While estimating your budget please keep the following items in mind:
 - Institutional overhead and indirect costs may be included within the proposal. Examples include human resources department costs, payroll processing and accounting costs, utilities, property and liability insurance, and building maintenance as well as additional project expenses such as costs for publication, IRB / IEC review fees, software license fees, and travel. Please note: Betalin does not provide funding for capital equipment.
 - Betalin maintains a company-wide, maximum allowed overhead rate of 25% for independent studies and projects.

- Organizational Detail (not to exceed 1 page)

Describe the attributes of the institutions/organizations/associations that will support and facilitate the execution of the project and the leadership of the proposed project. Articulate the specific role of each partner in the proposed project.

iii. Proposal submission

- Proposals should be single-spaced using Calibri 12-point font and 1-inch margins. There is a 3-page limit for the main section and a 1-page limit for organizational detail.
- Proposals should be sent to info@betalintherapeutics.com
